

POLICE ORDER No. 86

Inspection
of arms and
explosives
by Circle
Inspectors
of police.

It has come to notice that P. M. Rule 71 (b) is not being followed strictly by the Circle Inspectors in regard to the inspection of arms and explosives resulting in their leakage and misuse. As the danger to public security as a result of such leakage is quite great. It is essential for Circle Inspectors and Thana Officers to arrange for periodical and surprise inspections of all arms, explosives shop including fire-work shops, in their jurisdictions. As a list of shops is usually kept at the police-station, it does not require much effort for either of them to combine this work with touring. The local S. B. Os. should also keep a secret watch for any misuse of explosives and promptly report on leakages thereof. Any negligence on this account will be very sternly dealt with in future.
